## **DETAILED ACTION**

### ***Election/Restrictions***

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-26 and 29-32, drawn to a method for using an electrostatic charge to coat a shell.

Group II, claim(s) 27-28, drawn to an apparatus for using an electrostatic charge to coat a shell.

2. The inventions listed as Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: The common technical feature is taught by Sun et al. (Pre-Grant Publication 2001/0018098 A1).

3. In regards to claim 27, Sun et al. teach an apparatus for the production of a capsule shell ("pharmaceutical tablet" Sun Abstract), the apparatus including a substrate ("recipient substrates" Sun Abstract), a source of charged powder material ("particles in a dry powder" Sun Abstract) and a voltage source ("electrostatic chuck" Sun Abstract) for applying a bias voltage between the source powder material and the substrate ("electrostatic deposition" Sun Abstract) to generate an electric field

Art Unit: 1791

therebetween such that powder material is applied to substrate ("electrostatically attract particles" Sun Abstract).

4. A telephone call was made to Leonard Mitchard on 12/12/08 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
